

Notes 1

What is Markdown?

Markdown is a lightweight markup language used to format plain text with simple syntax, creating structured documents like README files, documentation, and notes.

What is Git?

Linux is a distributed version control system that tracks source code changes, enables collaboration, manages project history, branching, merging, and ensures efficient software development workflows.

What is GitHub?

GitHub in Linux is a cloud-based platform for hosting Git repositories, enabling collaboration, code sharing, version control, issue tracking, pull requests, and streamlined open-source or private development.

What is Slack?

Slack in Linux is a collaboration and messaging tool that supports channels, direct messaging, file sharing, integrations, and notifications, enabling teams to communicate and coordinate efficiently
